

An Exclusive Invitation

Introducing Alma Laser's Newest Technological Breakthrough ClearLift™ & ClearChoice™

Dear Doctor,

You are specially invited for a sharing session over dinner on **5th October 2012, Friday**, to discover with us the latest technologies from Alma Lasers, prepared by NeoAsia Singapore.

Our invited guest speaker for the session is Dr. Kee Lee Tan from Australia, Perth. Dr Tan is the Medical Director of Rejuvenate Clinic in Australia since 1999. He specializes in non-surgical cosmetic procedures such as Lasers, Non-surgical liposculpturing, Intense Pulse light, Medical microdermabrasion, anti-wrinkle treatments and dermal fillers. He also does platelets treatments and stem cells.

More about Dr Kee Lee Tan

Dr Kee Lee Tan graduated from University of Western Australia in 1992. He worked in Royal Perth Hospital from 1992 till 1997 undergoing his surgical training. In 1999, he started practising Cosmetic Surgery. He underwent the Cosmetic surgery training programme with the Australasian College of Cosmetic Surgery, and he obtained his Fellowship in Cosmetic Surgery and Medicine in 2002.

Dr Tan is actively involved in research and has published numerous papers in Cosmetic Medicine in topics such as Microdermabrasion, Non-Surgical Liposculpturing, Safety of Fractionalized CO₂ lasers on Asian skin and recently a White paper on ClearLift™. He has been teaching doctors in Indonesia since 2002 the art of Cosmetic medicine and surgery.

ClearLift™ - The world's first fractional non-ablative 1064nm Q-Switched laser

A non-invasive High Power Q-Switched Laser for the invasive removal of various colored tattoos, deep and superficial benign pigmented lesions, it offers the world's only fractional, non-ablative and virtually painless solution for **collagen remodeling**, for unmatched improvement in appearance of wrinkles and skin laxity.

ClearChoice™ - The innovative Combined Lasers Protocol targeting Nail Fungus

Discover an advanced protocol that combines two laser technologies for the treatment of nail fungus (onychomycosis). Treatment effectiveness is proven in clinical studies, with minimal discomfort and no side effects and in most instances a series of **2-3 quick treatment sessions**, to eradicate the source of infection and prolonged immunity to fungus recurrence.

We look forward to welcome you at the workshop.
